

White MFPP Chicken and Rib Containers

White bases are now available for our classic two-piece mineral filled polypropylene (MFPP) chicken roasters, chicken barns and rib containers.

Reduced environmental impact

Mineral filled polypropylene (MFPP) bases are made with 50% less plastic than traditional PP containers, reducing fossil fuel-based material usage.

Versatile merchandising

Containers are suitable for both hot and cold applications, reducing operator SKUs and increasing efficiencies. These containers are suitable for use in hot case displays, warming units and under heat lamps. EarthChoice® MFPP bases and PP lids are also suitable for reheating in a microwave.

Transport with confidence

Our ZipSeal™ Closure System's leak-resistant seal keeps package contents secure during transport. The easy-to-apply lid has an audible snap indicating the lid has been sealed.

White MFPP Chicken and Rib Containers

What temperature range is recommended?

Virtual Packaging Assistant

The Virtual Packaging Assistant (VPA) app can be used for all of your Foodservice Packaging Solutions! It is available for download on all Apple, Android and Windows devices.

These guidelines are supplied to assist you in determining the proper use of Pactiv Evergreen products. They are based upon testing and published guidelines and are reliable in most applications. However, because every food supplier's recipes, ingredients, processes and supply chain is unique, these guidelines are not a substitute for product testing. Confirmation of product acceptability under your specific conditions of use must be done by you.
