

MFPP PP

Bowls and Lids

This EarthChoice® line of multi-purpose bowls are durable, lightweight and are a sustainable choice for your takeout and delivery needs.

Reduced environmental impact

EarthChoice® mineral filled polypropylene bowls are made with 50% less plastic than traditional polypropylene containers, reducing fossil fuel based material usage. The polypropylene lids are recyclable. Check locally; may not be recyclable in all areas.

Efficient combo pack

Bases and lids ship together in smaller pack quantities and take up less shelf space.

Ideal for takeout and delivery

The leak-resistant ZipSeal™ helps to prevent messy spills and maintain food quality, while the stackable lids and bases nest securely to help keep product in place during transportation.

Consumer confidence

Customers enjoy that these containers easily go from refrigerator to microwave and are top-rack residential dishwasher safe.

MFPP PP Bowls and Lids

Virtual Packaging Assistant

The Virtual Packaging Assistant (VPA) app can be used for all of your Foodservice Packaging Solutions! It is available for download on all Apple, Android and Windows devices.

These guidelines are supplied to assist you in determining the proper use of Pactiv Evergreen products. They are based upon testing and published guidelines and are reliable in most applications. However, because every food supplier's recipes, ingredients, processes and supply chain is unique, these guidelines are not a substitute for product testing. Confirmation of product acceptability under your specific conditions of use must be done by you.
