

## Rib Containers

Showcase ribs, entrées, meal kits and other foods to-go with Pactiv Evergreen's rib containers!

### Transport with confidence

Our ZipSeal™ Closure System's leak-resistant seal keeps package contents secure during transport. The easy to apply lid has an audible snap indicating the lid has been sealed.

### Superior visibility

Dome lids feature excellent visibility without condensation due to anti-fog technology. For optimal clarity, choose our oriented polystyrene (OPS) domes.

### Versatile merchandising

Containers are suitable for both hot and cold applications, reducing operator SKUs and increasing efficiency.

### Reduced environmental impact

EarthChoice® mineral filled polypropylene (MFPP) bases are made with 50% less plastic than traditional polypropylene (PP) containers, reducing fossil fuel based material usage. PP dome lids are recyclable in the communities that accept these products. Check locally.

### High heat performance

Rib containers are suitable for merchandising in hot case displays, heat lamps and warming units. EarthChoice MFPP bases and PP lids are also suitable for reheating in a microwave.

## What temperature range is recommended?

### Virtual Packaging Assistant

The Virtual Packaging Assistant (VPA) app can be used for all of your Foodservice Packaging Solutions! It is available for download on all Apple, Android and Windows devices.

These guidelines are supplied to assist you in determining the proper use of Pactiv Evergreen products. They are based upon testing and published guidelines and are reliable in most applications. However, because every food supplier's recipes, ingredients, processes and supply chain is unique, these guidelines are not a substitute for product testing. Confirmation of product acceptability under your specific conditions of use must be done by you.
