

Hot Cups, Soup Cups, Lids & Sleeves

Sustainable and renewable solutions for serving hot drinks and soups.

Sustainable and renewable solutions for serving hot drinks and soups.

Commercially compostable cups and lids

EarthChoice drink cups, soup cups, and lids are BPI-certified to be commercially compostable.*

Renewable resources

EarthChoice drink and soup cups are made from polylactic acid (PLA) coated paperboard. PLA is a resin derived from annually-renewable plants. This resin is also used for our drink cup lids. Our soup cup lids are made of a fiber blend, while our cup sleeves are made from recycled paper.

Show your commitment

Tell your customers you care about the environment when you select our EarthChoice stock print drink and soup cups. Cups are well labeled so consumers know these should be placed in composting bins, not trash bins.

Great on-the-go options

A lid can be added to most cups sizes so your drinks and soups can be transported without messy leaks or spills. Add an EarthChoice cup sleeve to protect hands from hot beverages.

*Commercially compostable only. Facilities may not exist in your area. Not suitable for home composting.

Drink cups

EarthChoice cups are strong, sustainable, and are a great choice for a range of drinks from iced coffee to hot cocoa. The PLA coated paperboard won't melt or deform when used for hot drinks and has a heat tolerance of 185°F/85°C.

PLA lids

Pair these EarthChoice PLA lids with any of our 10 to 20 oz. EarthChoice drink cups for a leak-resistant seal that allows consumers to safely enjoy their favorite hot beverages on the go! These lids are BPI-certified to be commercially compostable.*

Cup sleeves

EarthChoice sleeves are the perfect insulating barrier between hot beverages and customers' hands. These one-size-fits-all cup sleeves are made with a minimum of 30% post-consumer recycled materials.

Soup cups

Perfect for hot or cold foods, these EarthChoice soup cups can be used for a variety of menu items such as soup, ice cream, pasta salad, and mac and cheese. The PLA coated paperboard is moisture resistant so these containers can safely be used for saucy foods.

Fiber blend lids

These commercially compostable* and renewable fiber blend lids can be paired with our 8 to 16 oz. EarthChoice soup cups to safely transport foods for delivery and take out. PFAS-free option available.

*Commercially compostable only. Facilities may not exist in your area. Not suitable for home composting.
